

# PROCESS AUTOMATION

Complaint & Feedback Management

Kenneth Jay Bruno  
Master of Science in Information Systems

# INTRODUCTION

Local governments  
require efficient  
systems to handle  
citizen complaints  
and feedback

Manual and  
fragmented  
processes cause  
delays, data loss,  
and poor  
monitoring

Process  
automation  
provides a digital,  
transparent, and  
efficient solution

# OVERVIEW

Centralized and  
official Citizen  
Satisfaction  
Measurement and  
Reporting (CSMR)  
system of the City  
Government of San  
Fernando, La  
Union

Serves as the main  
platform for Citizen  
complaints,  
Feedback, Service  
satisfaction  
monitoring

# CURRENT CHALLENGES

Manual submission  
of complaints  
(paper-based or  
untracked  
channels)

Lack of centralized  
records

Delayed response  
and resolution

Difficulty in  
monitoring  
performance and  
accountability

Limited data for  
decision-making

# PURPOSE OF PROCESS AUTOMATION

Centralize  
complaint and  
feedback handling

Standardize  
procedures across  
city departments

Improve response  
time and service  
quality

Enhance  
transparency and  
accountability

Support  
data-driven  
governance

# SCOPE OF THE AUTOMATED SYSTEM

Online complaint  
and feedback  
submission

Automated case  
classification and  
routing

Tracking and  
monitoring of  
complaint status

Department-level  
case management

Reporting and  
analytics for  
management

# KEY STAKEHOLDERS

City Government  
Offices and  
Departments

System  
Administrators

Citizens of San  
Fernando, La Union

City Management  
and  
Decision-Makers

# AUTOMATED PROCESS FLOW

Citizen submits  
complaint or  
feedback via EPS

System records and  
categorizes the  
submission

Complaint is  
automatically  
routed to the  
concerned office

Office reviews and  
takes action

Status updates and  
notifications are  
sent

Case is resolved  
and recorded in the  
system

# KEY AUTOMATED AUTOMATED

Online submission  
portal

Attachment  
support (photos,  
documents)

Automatic routing  
and notifications

Real-time status  
tracking

Centralized  
database

Audit trail and  
documentation

# DATA ANALYTICS & REPORTING

Consolidated  
complaint and  
feedback data

Performance and  
response-time  
monitoring

Identification of  
recurring issues

Citizen satisfaction  
analysis

Generation of  
management and  
compliance reports

# BENEFITS OF AUTOMATION

Faster processing  
and resolution

Reduced  
paperwork and  
manual errors

Improved  
accountability of  
offices

Better service  
performance  
monitoring

Increased citizen  
trust and  
satisfaction

# IMPACT IN GOVERNANCE

Strengthens  
transparency and  
responsiveness

Supports  
evidence-based  
decision-making

Improves public  
service delivery

Aligns with good  
governance and  
digital  
transformation  
initiatives

# IN CONCLUSION

The automation  
modernizes  
complaint and  
feedback  
management

Provides a  
centralized,  
transparent, and  
efficient system

Enhances citizen  
satisfaction and  
service excellence

Supports the City  
Government of San  
Fernando, La  
Union's  
commitment to  
good governance
